~ all good things come to an end ~

November 2024

*From testing our
teaching materials to
hosting successful
multiplier events*

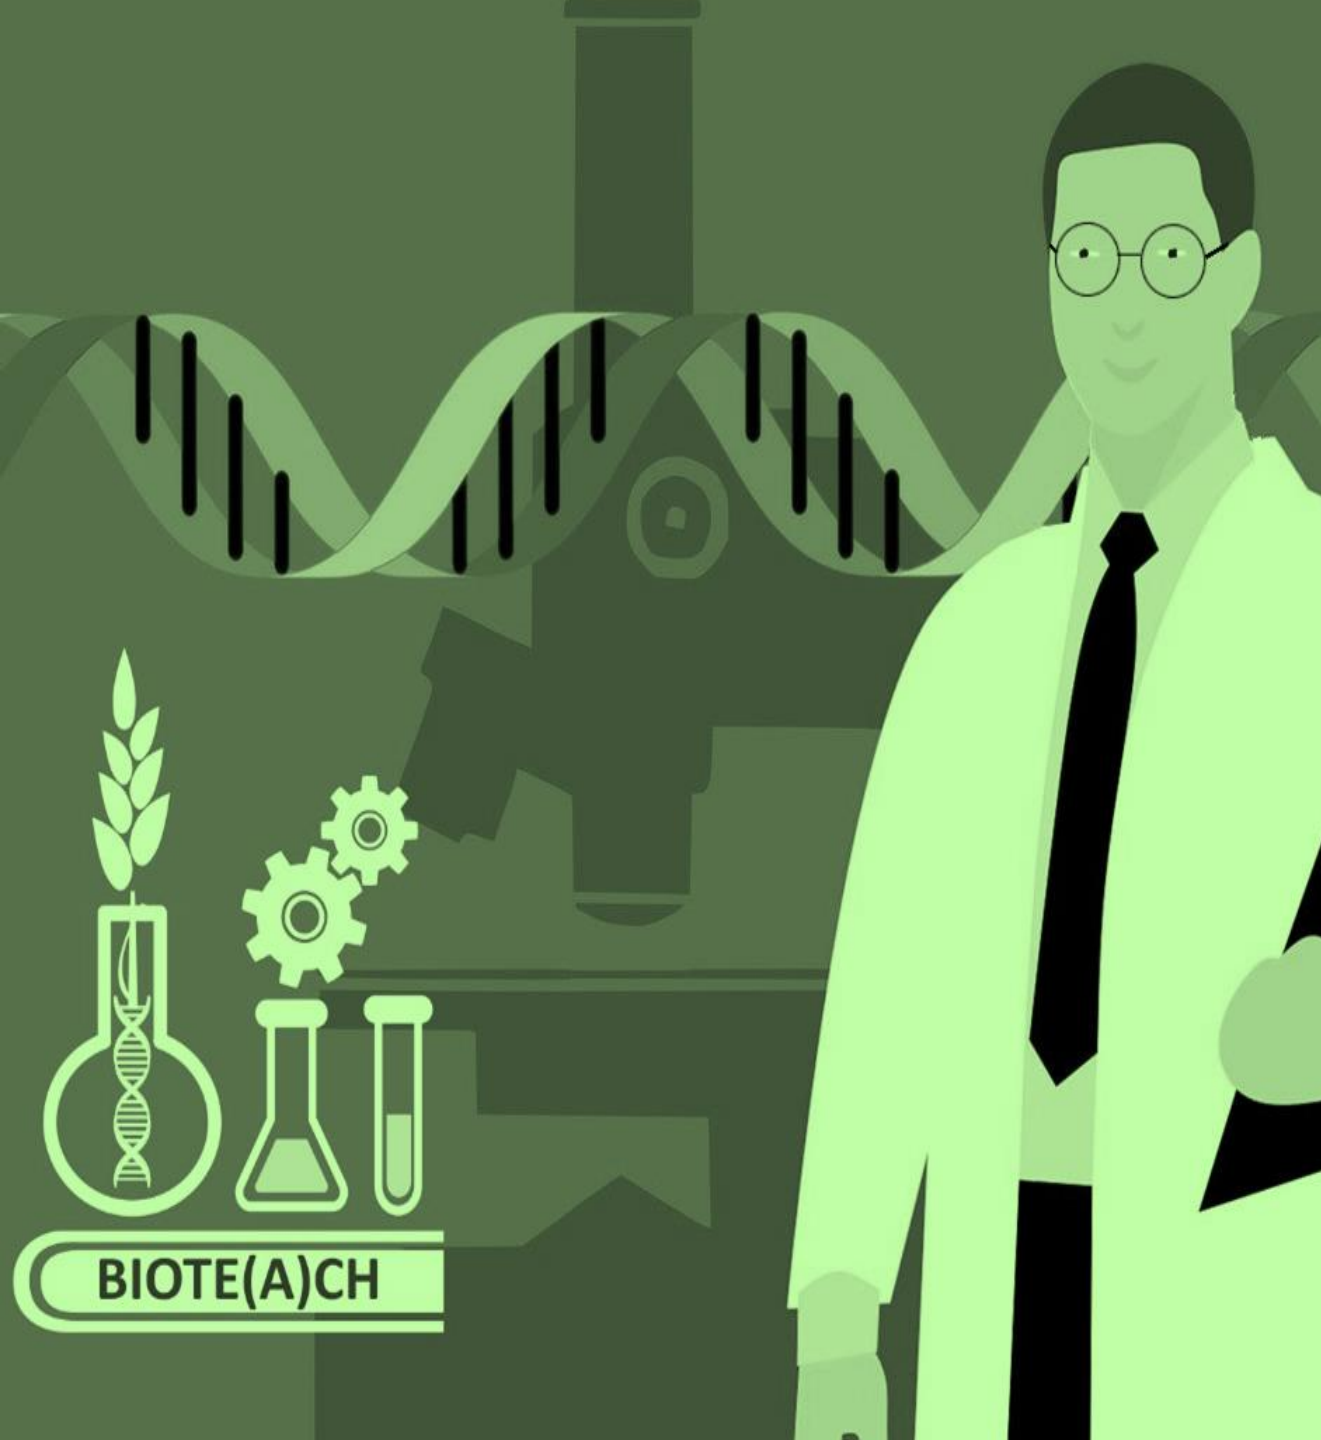

Co-funded by
the European Union

Dear BIOTE(A)CH
Community,

As we reach the culmination of the **BIOTE(A)CH project**, we're thrilled to share updates from the pilot stage and celebrate our accomplishments with all those who have contributed along the way.

From **testing our teaching materials** to **hosting successful multiplier events**, this journey has been marked by learning, collaboration, and innovation.

BIOTE(A)CH

SUCCESS STORIES BOOKLET

A total of 10 success stories were collected to remind us that success is not only defined by achievements, but also by the resilience, determination and passion that drives individuals to overcome obstacles and make a positive impact on the world.

They inspired us to take on challenges, utilize our strengths and forge our own path to success, no matter how daunting the journey may seem.

Pilot Stage

As the BIOTE(A)CH project progressed to the pilot stage, students finally had the opportunity to bring their ideas to life in the lab. After months of preparation, theoretical work, and planning, they were able to step into a real laboratory environment and test their concepts directly. This hands-on experience not only allowed them to explore and refine their ideas but also gave them invaluable practical skills that will serve them in their future careers.

In line with our commitment to making BIOTE(A)CH accessible to a wider audience, we held a series of multiplier events in each partner country. These events provided a platform to share project insights, present teaching materials, and discuss best practices with academics, industry representatives, and students. Attendees had the opportunity to explore the project's core components and learn from the pilot stage outcomes. Additionally, participants connected through networking sessions, strengthening collaborations that promise to carry the project's impact forward. Feedback from these events has been overwhelmingly positive.

Participants appreciated the high-quality presentations, engaging discussions, and opportunities to connect with like-minded professionals. The events underscored the growing need for innovative, sustainable education in biotechnology—a main BIOTE(A)CH goal.

Multiplier Events

Sharing Knowledge Across Borders

Looking Ahead

Sustaining BIOTE(A)CH's Legacy

We extend our heartfelt thanks to everyone who has supported and contributed to BIOTE(A)CH.

Together, we have created a powerful resource for change!

Let's keep the spirit of BIOTE(A)CH alive!

As the BIOTE(A)CH project comes to a close, we're encouraged by the progress we've made and the foundations we've laid for sustainable education in biotechnology. The resources, success stories, and connections built during this project have created a legacy we hope will continue to inspire educators and students well into the future.

Warm regards,
The BIOTE(A)CH Project Team
